NEW MOVIE CAMERA

IS RUN BY CLOCKWORK

LONDON, Feb. 20.—(I. N. S.)—A new camera for taking kinetograph pictures has been produced which does away with the handle at present used for winding the film, a special type of clockwork motor being used instead.

A tripod stand need not be used, and the lightness and inconspicuousness of the camera will enable kinetograph operators to take pictures of a more intimate type than they can at present obtain.

The camera can be loaded in daylight, a sliding shutter allows a direct focusing, and the camera can in a moment be converted into a printing machine for making the positive films.

Beeskeepers should see to it that every hive is headed by a young, prolific Italian queen. The hives should be left packed as late in the spring as possible to avoid chilling the brood on cold nights.—O. A. C. Experiment Station.

Acquitted of Murder—Re-Arrested

Gussie Humann was acquitted Dec. 14 in Queens county, N. Y., on the charge of murdering Harry Garbe, a former sweetheart. Testimony at the trial of Joseph Libasci on the same charge led to her re-arrest. She is now charged with being an accessory to the crime.

An Air Traffic Cop

The latest device installed in the traffic control tower at the London Air Station is a wireless telephone extension which allows the operator to communicate with any express flying between London and the coast. From a platform of the tower the "traffic cop" directs, through a megaphone, movements of planes on the field.
